

SOLTA® FELT // WOOL FELT

We produce SOLTA®FELT roller goods in widths up to 2000 mm. However, just like the lengths, they depend on the thickness, the area weight and finally the quality. The thicknesses are between 1 mm and 30 mm. Wool felts are classified according to the degree of hardness.

	WHITE	MOTTLED	COLOURED
SOFT	thicknesses of 1 - 20 mm <ul style="list-style-type: none"> for upholstery for insulation 	thicknesses of 1 - 25 mm <ul style="list-style-type: none"> for upholstery for insulation for packaging industry 	thicknesses of 2 - 15 mm <ul style="list-style-type: none"> for interior architecture for creative design area for musical instrument construction
MIDDLE	thicknesses of 1 - 30 mm <ul style="list-style-type: none"> for sealing for insulation as storage medium 	thicknesses of 1 - 25 mm <ul style="list-style-type: none"> for sealing for insulation as a shoe top material as storage medium 	thicknesses of 2 - 10 mm <ul style="list-style-type: none"> for interior architecture for creative design area for musical instrument construction as a shoe top material
FIRM	thicknesses of 1 - 30 mm <ul style="list-style-type: none"> for sealing as storage medium for surface treatment 	thicknesses of 1 - 30 mm <ul style="list-style-type: none"> for sealing as storage medium for surface treatment 	thicknesses of 3 - 8 mm <ul style="list-style-type: none"> for musical instrument construction

Applications

Our SOLTA®FELT wool felts are an initial material for a number of manufacturing parts, which, for example are used in the following areas:

- the automobile industry
- mechanical engineering
- electrical industry / household devices
- furniture industry
- packaging materias
- shoe manufacturing
- steel production and finishing
- design and architecture
- musical instrument construction
- surface processing

We work with our customers to develop specific solutions for the widest range of applications.
