

NEEDLE FELTS FOR FILTRATION

SOLTA®FLUID // SOLTA®FILT // SOLTA®THERM

Always the best solution

When the highest requirements are placed on industrial applications, our diverse filter media are used.

What would you like to filter?

- Solids from fluids **SOLTA®FLUID**
- Solids from gases up to a temperature of 150°C **SOLTA®FILT**
- Solids from gases above a temperature of 150°C **SOLTA®THERM**

- Aerosols from gases **SOLTA®FLUID**

We produce many filter media with special equipment, e.g.:

- **FUTUR** // combination of fine dust filtration with high air permeability
- **AGLA-TF** // fine dust filter with PTFE equipment
- **NANO** // nanotechnology to improve efficiency
- **HO** // even especially for machines in contact with food
- **pleatable filter media** for high mechanical requirements
- **Micro-fibers** // improved fine dust separation

Our products are used as:

- filter elements in CIP machines
- filter hoses, filter pockets
- filter cartridges
- filter covering (e.g. drum filter / filterpresses)
- filter candles
- fine dust filters
- gaskets

Our lab service working for you:

- filter tests
- new product innovations
- damage analyses
